Light-Cure Orthodontic Adhesive

Resilience® Light-Activated Orthodontic Bonding Systems

Provides the optimum properties for bonding ceramic, metal, or plastic brackets using light-cure technology. The smooth, tacky composite resin delivers ideal handling characteristics which eliminates bracket flotation and allows for easy flash clean up. Light activation provides additional working time to ensure accurate bracket placement. Produces a strong light cured chemical bond which also debonds easily. Archwires can be placed immediately after fully curing the brackets. Contains fluoride to help protect against potential decalcification.

An Independent Clinical Evaluation Concluded that Resilience® Light-Cure Adhesive is...

"Recommended due to minimal bond failures."
"Very easy system to use."
Rated "Excellent" in its clinical evaluation.

Resilience® Low Viscosity Light-Cure Flowable Composite adhesive features a precision controlled syringe which prevents overflow and run-on. It ensures accuracy as it flows easily into difficult areas, but is reliable not to slump or run until light curing occurs. The disposable tip provides precise application, accessibility, and control resulting in excellent aesthetics. It is dependable, strong, and more resistant to shock and stress. It can be used in many ways such as bonding lingual retainers, Invisalign® attachments, occlusal build-ups for opening a posterior bite, indirect bonding, and much more! Contains fluoride to help protect against potential decalcification.

LV Flowable Composite Kit
Item #: FC-RESI-007
1x 1.6 gm syringe green etchant, 3x 2 gm flowable composite syringes, 1x 3 mL light cure enamel bonding sealant resin, 25x Flowthru™ 22 gauge syringe tips, 10x 2½” bonding brushes, instructions

LV Flowable Composite Syringe
Item #: FC-RESI-008
1x 2 gm flowable composite syringe and 10x Flowthru™ 22 gauge syringe tips

Resilience® Primer-Activated Orthodontic Bonding Systems

Provides the optimum properties for bonding ceramic, metal, or plastic brackets using a primer activated no-mix bonding system. This is a chemically cured system which does not require pre-mixing. The thick tacky composite resin delivers ideal handling characteristics which eliminates bracket flotation and allows for easy flash clean up. Produces a strong chemical bond which also debonds easily. Archwires can be placed 5 minutes after bonding the last bracket. Contains fluoride to help protect against potential decalcification.

No-Mix Orthodontic Adhesive

Resilience® Primer-Activated Orthodontic Bonding Systems

A. Primer-Activated Syringe Kit
Item #: FC-RESI-012
4x 3.5 gm syringes, 1x 9 mL enamel catalyst primer, 1x 4 gm green gel etchant syringe with 5x 22 gauge syringe tips, 2x 10 cavity mixing wells, 1x 50 sheet mixing pad (1⅛" x 2¼"), 1x brush tip holder with 40x ¾" brushes, and 10x 2" brushes

B. Primer-Activated Syringe Introductory Kit
Item #: FC-RESI-012SK
1x 3.5 gm adhesive syringe, 1x 3 mL primer, 5x 2 ½" bonding brushes, 1x instruction sheet

Separate Refill Components

- Primer-Activated Syringe
  Item #: FC-RESI-024
  3.5 gm per syringe
- Enamel Catalyst Primer
  Item #: FC-RESI-027
  9 mL per bottle
- Conditioner/Primer
  For use when bonding to special surfaces.

Resilience® Glass Ionomer Paste/Paste Band Cement

A multi-cure fluoride containing glass ionomer band cement in a two paste system which offers a dual curing capability. May be used with or without a curing light. There is approximately a 3 minute working time and 10 minute set time without use of curing light.

Multi-Cure Economy Kit
Item #: FC-GRAN-061
4x 5 gm base and 4x 5 gm catalyst, 2x 50 sheet mixing pads (2 ¾” x 2 ¾”), 10x spatulas, 1x instructions for use

Light-Cure Band Cement

Blue Shade

Low Viscosity Gel Allows for Controlled Use!
Resilience® Light-Cure Band Cement

Light-Cure Single Component Push Syringes
A light-activated band cement in a single paste system which provides a longer working time and a rapid setting time. Can be placed directly into bands. Excess flash is easy to clean up prior to the light curing and the cement is easy to see due to the blue color. Contains fluoride to reduce the chance of decalcification.

Multi-Cure Band Cement

Ideal Viscosity for Posterior Molar Pads

Light-Cure Band Cement Kit
Item #: FC-RESI-038
6x 5 gm push syringes

Refill Syringes
Item #: FC-RESI-041
5 gm per syringe
Resilience® Glass Ionomer Powder/Liquid Band Cement

A two part glass ionomer band cement system of powder and liquid. It contains fluoride which reduces the incidence of decalcification. Resilience chemically bonds to enamel without the use of etchants. It has a low film thickness and will not wash out under bands. The final setting time is 6 to 7 minutes.

A. Powder/Liquid Starter Kit
Item #: FC-GRAN-002
1x 50 gm powder and 1x 50 mL liquid, 1x 50 sheet mixing pad, 1x measuring scoop, 1x instructions for use

B. Powder/Liquid Economy Kit
Item #: FC-GRAN-059
1x 100 gm powder and 2x 50 mL liquid, 1x 50 sheet mixing pad, 1x measuring scoop, 1x instructions for use

Separate Refill Components
Measuring Scoop
Item #: FN-PLAS-087

Discover The GC Fuji Difference Bonds Perfectly In A Wet Field!

GC Fuji ORTHO™ LC Bracket Adhesive
- Bond in a Wet Field
- No Etch Required
- Significant Fluoride Release and Recharge

Now you can work faster and easier; and get all the strength needed, with little chance of decalcification (white spots) and enamel damage at debonding. Fuji ORTHO LC delivers benefits that composite resins cannot claim. A continual fluoride release promotes remineralization and helps maintain the soundness of the enamel.

- Clinically proven. Fuji ORTHO LC offers significant advantages over composite bonding systems and greatly reduces chairtime.
- Fuji ORTHO LC features low sensitivity to moisture and can be used in the presence of saliva.
- Fuji ORTHO LC bonds metal and porcelain brackets and metal bands to enamel.

Light Cure Standard Kit*
Item #: 439403

The Traditional High Power Mode (1,500 mW/cm²) allows you to polymerize light-cured adhesives at 5, 10, 15, or 20 second intervals.

Easily switch to the Plasma Emulation Mode (2,700 mW/cm²) for quicker cure times of 1.5, 2, 2.5, or 3 second intervals and achieve chair time efficiencies and reduced orthodontic bonding times.

When using the plasma emulation mode, it is recommended to use the light shields to direct light only to the appliance and enamel, and prevent any unnecessary light dispersion to the gingiva.

Reduce Chair Time!

Reduce Bonding Time
The Cybird XD advanced curing light is designed particularly for the orthodontic professional in need of super-fast light curing and bonding speed to reduce chair time. It features two powerful curing modes to choose from for practice preference.

Wide Application Range
The Cybird XD LED produces a variable wavelength range of 430-490 nm, assuring full curability of a wide range of adhesives.

Functional Aesthetics
The ergonomically shaped curing light is well-balanced for ideal handling. Cybird XD’s square body prevents roll-off at chairside tables and is shaped for a more natural grasp.

Clever Construction
Built from industrial grade lightweight aluminum. The turbo 8 mm fiber-optic light guide and sleek body design grants superb oral access for effortless usability.

Intuitive Keypad
Practitioners save time with simplicity: a shot button and a mode selector/timer button for various applications.

1 Year Limited Warranty

Fully Exposes Both Arches to Provide Maximum Access

- Direct and indirect bonding procedures
- Full field access
- Interproximal stripping
- Bite registration
- Photography
- Debonding
- Microetching

Advantages:
- Unique intraoral extensions retract buccinator muscles
- Provides unobstructed view and superior buccal access
- Maintains accessibility during all types of procedures
- Safe for autoclave and dry heat sterilization up to 350°F/177°C

High Heat Cheek Retractor

The easy to use, one size fits all Cheek Retractor that provides superior intraoral access. The unique buccal extensions retract powerful buccinator muscles for maximum access. Made of high quality medical grade materials that withstand repeated sterilization.

- Maximum patient comfort
- Easy tension control
- Boosts visibility to intraoral work areas
- Made in the USA

Item #: 601-190

Nola Dry Field System

Achieve Total Bonding Success...

- Full Arch Access for Bonding
- Adjustable to Arch Length
- Maximum Patient Comfort
- Excellent Soft Tissue Retraction
- Fully Autoclavable to 280°F/135°C
- Reduces Bond Failure
- Prevents Treatment Delays

The Nola Dry Field System completely eliminates saliva and fully exposes both arches making it ideal for all bonding applications.

The system is easy to assemble, be inserted, and used by a single operator. The entire system is completely autoclavable making clean-up easy.

Microetcher™
Intraoral Sandblaster

Benefits
• Increases bond strength up to 400%
• Stainless construction and replaceable carbide tip
• Nozzle rotates 360° for easy access

Uses
• Etch all metals, composites and amalgam
• Perfect for adhesive removal for rebonds or for etching the inside of bands
• Surface abrasion procedures in seconds

Microetcher IIA
Fully Autoclavable Intraoral Sandblaster
Item #: 22005
1x handpiece, 2x abrasive reservoirs, 1x air line, and 1x user guide

Autoclavable up to 269°F/132°C
Plastic jar and tubing must be removed and abrasive jar filter removal recommended prior to sterilization
